Trains must obtain clearance cards before leaving New Almaden and Boulder Creek, when operator is on duty.

REGISTERING STATIONS:
Boulder Creek, Felton, Campbell and New Almaden

SPECIAL RULES.

1. Bulletin Boards are located at San Francisco, San Jose, Gilroy, Pajaro, Salinas, San Luis Obispo, Surf and Santa Barbara, Wright and Santa Cruz.

2. West-bound extras, and trains on the Tres Pinos Branch will register at Carnadero. At registering stations which are day and night telegraph stations and which are not regular stops, first-class trains need not stop to register, or to check the register, or to make out check of train register form 2127, but will throw off a register ticket form 2588 to the operator giving the information required by the register, reducing speed if necessary, and the operator will then register for them. Conductors and operators will comply with Rule 96 at registering stations where trains are not required to register, the same as at non-registering stations, the operator notifying all opposing trains which are of the same or inferior class to the train taking down signals. Trains going via S. P. C. Co. to and from Santa Clara and Western Division trains will register at Santa Clara. Train 62 will register at Carnadero.

3. Standard clocks are located in the Dispatcher's office San Francisco, Yard Master's office San Francisco, Machine Shops 16th St. San Francisco, Telegraph office San Jose, Gilroy, Tres Pinos, Pajaro, Santa Cruz, Castroville, Pacific Grove, Salinas, Santa Margarita, Dispatcher's office San Luis Obispo, Telegraph office Surf, Lompoc, Santa Barbara, and Boulder Creek.

4. In addition to stations at which a train originates on the Division, Salinas and San Luis Obispo are initial stations for all except first class trains.

5. San Francisco yard limits extend from Third St. station to Randall St. crossing.

Monterey yard limits from Monterey station to Del Monte station.

South San Francisco yard limits from west switch, South San Francisco, to and including "Y" switch leading to Tanforan.

Salinas yard limits, from Salinas to Spreckels.

San Jose yard limits, from Santa Clara to Valbrick on the standard gauge line, and from Santa Clara to Dougherty on S. P. Co. line.

Santa Cruz yard limits from just east of San Lorenzo bridge on Pajaro-Santa Cruz line to 300 feet west of Ellis siding on old narrow gauge line.

Trains must reduce speed to 15 miles per hour between San Jose Passenger Depot and the west end of Gaudalupe River trestle. East-bound trains must get a signal to "Proceed" from the switch tender at switch to old main line (or roundhouse track) before fouling said junction switch. As Guadalupe River trestle is not provided with sidewalk, care should be taken to avoid stopping passenger trains thereon.

c. **Double track extends from 3d & Townsend St. Station to 18th St., San Francisco, from Ocean View to Holy Cross and from San Bruno to San Jose. All trains will run to the right between these points. The switches at the end of double track at 18th St., San Francisco, Ocean View and Holy Cross will be handled by switch tenders, but trains must approach them carefully, speed not exceeding 8 miles per hour. In the absence of the switch tenders, trainmen will handle switches, which must be left set for east-bound main track at 18th St., San Francisco and Holy Cross, and for the west-bound main track at Ocean View. Conductors of all trains must throw off form 2588 properly filled out at switch tender's house at 18th St., San Francisco., and Holy Cross. Engineers approaching San Bruno and Baden must sound 1 short, 1 long, 1 short — ——— — blast of the whistle if they wish switch lined up for track via Tanforan, and 2 short, 1 long, 2 short — — ——— — — blasts of the whistle if they wish switch lined up for track via South San Francisco. Trains approaching San Bruno from South San Francisco must sound 1 short, 1 long and 2 short — ——— — — blasts of the whistle if they wish switches lined up for the east-bound main line.**

d. **The top blade on double arm pole west of the Signal Tower at San Bruno, on the Tanforan track, will govern the movements of the east-bound trains straight through on east-bound track. The lower blade on the same pole will govern the movements of east-bound trains in crossing over to west-bound track or on to spur track.**

The top blade on double arm pole west of the signal Tower, on the South San Francisco track, will govern the movements of east-bound trains straight through on east-bound track. The lower blade on the same pole will govern the movement of trains on to west-bound track or spur track.

The top blade on the double arm pole east of the Signal Tower, will govern the movements of west-bound trains via Tanforan. The lower blade on the same pole will govern the movements of west-bound trains via South San Francisco.

Trains entering and leaving east end of San Jose yard will be governed by semaphore signals from interlocking tower.

6. Sidings on double track are located at Millbrae, San Mateo, San Carlos, Fair Oaks, Mayfield, Mountain View and Lawrence. Cross-overs at San Bruno, Burlingame, Belmont, Redwood, Menlo Park, Palo Alto, Castro, Sunnyvale and Santa Clara. When using cross-overs, trainmen must comply strictly with Rule 99. Street crossings at San Mateo must not be blocked to exceed five (5) minutes.

7. Block System limits are between Bryant St., San Francisco, and San Bruno, and between San Jose and Gato.

b. If semaphore of block system is at danger before a train enters the block, or is at safety and does not change to danger when a train enters the block, the train must stop, send a flagman in advance immediately, wait five minutes after the flagman has started, and then proceed under full control, not exceeding six miles per hour, until the train passes out of the block.

On single track between San Francisco and San Bruno, trains arriving at stations where they expect to meet and pass other trains must not occupy the main track between switches until the expected train has passed the signal at opposite end of the adjoining block unless the opposing train has lost both rights and class, as prescribed by Rules 4 and 82 or at the expiration of a time order; otherwise the train standing in the overlap will hold in delay approaching trains.

b. Inside block signal limits east of San Jose, west-bound trains arriving at stations where they expect to meet and pass other trains may occupy the entire main track inside of station yards without holding signals other than home signal at the end of yard, and its distant signal 2,000 feet in advance, against opposing trains. Switch may be opened to head east-bound trains on to passing track. This rule also applies to east-bound trains intending to hold the main line at stations where there is no overlap.

East-bound trains arriving at stations where there is an overlap, expecting to meet and pass other trains and intending to hold the main line, should be careful that no portion of the train stands east of post marking end of overlap of adjoining block.

Overlap posts are painted white from the top down 4 feet, and black at base, and indicate end of overlap at Hillsdale, Madrone, Sargent, Aromas, and Grover. Switches at these stations must not be opened to head west-bound trains on to passing track until same have passed signal at east end of adjoining block.

At all points where block signals are in service, both ends of cross-over links connecting two main lines or connecting main line and siding, must, after heing used, he left lined up for the straight track. With either switch set for the cross-over, signals will stand at danger. This does not apply where a link cross-over in the middle of a long siding is used as the end of a passing track. Where side tracks lead directly into main line, derails must be left open after being used, otherwise signals will stand at danger, delaying trains.

8. **On double track, trains must not under any circumstances, pass between a station and a train on the opposite track receiving or discharging passengers; and when on the opposite track farthest from the station, may only pass a train at very slow speed and with great caution when a train is receiving or discharging passengers. Engineers should use good judgment and reduce speed far enough back so as to avoid a dead stop when they see that another train is about to take the station. Trains which do not stop at the station should be given preference. In case of two trains, both of which are scheduled to stop, west-bound train should have preference.**

9. Switch at Baden will be handled by switch-tender between the hours of 7 a. m. and 7 p. m. Trains must approach this point carefully, speed not exceeding 8 miles per hour. Engineers of west bound trains approaching Baden via South San Francisco must note the indication of this signal before switch is opened and be governed accordingly, as the signal will stand at "stop" with switch open. Between 7 p. m and 7 a. m., or in the absence of switch-tender, trainmen must handle switches, which must be left set for track via Tanforan.

a. Trains for which time is shown at Tanforan will proceed via Tanforan. Trains for which time is shown at South San Francisco will proceed via South San Francisco. East-bound trains via Tanforan, scheduled to meet west-bound trains via South San Francisco, at Baden, may leave Baden without awaiting arrival of west-bound trains, but must not leave San Jose until they have ascertained that the train has passed onto double track at that point. East-bound trains via South San Francisco, scheduled to meet west-bound trains via Tanforan at Baden, may leave Baden without awaiting arrival of west-bound train, but must not leave San Jose until they have ascertained that the train has passed onto double track at that point.

b. The switch at the junction of the standard and narrow gauge lines near New Almaden must be left set for the narrow gauge line. On joint track between this junction and New Almaden station both narrow gauge and standard gauge trains are equal, and they must move under control.

c. S. P. Co. trains and San Jose, Los Gatos & Interurban Ry. Co. cars will use S. P. Co. tracks from the junction between Campbell and L. G. & S. J. road to L. G. & S. J. road jointly. S. P. Co. trains 805 and 806 have right over San Jose, Los Gatos & Interurban Ry. Co. cars on joint track, but must come to a stop before going on joint track and not exceed a speed of ten miles an hour over joint track. All other S. P. Co. trains must first come to a stop before going on joint track and send a flagman in advance immediately, wait five minutes after the flagman has started and then proceed under control at a speed not exceeding six miles per hour until the train has passed off joint track, taking particular care not to close down on the flagman ahead until he has reached the end of joint track. All such other S. P. Co. trains must be protected to the rear as per Rule 99.
